Sapling Learning

Powerful Online Homework, Assessment, and Tutorial Learning

Student Survey Results:

95% felt that Sapling Learning helped them succeed

89% would recommend that their professors use Sapling Learning

Developed by chemists and educators, Sapling Learning regularly engages students, dramatically improving their chemistry comprehension and problem-solving skills.

Easy. Automatically graded homework saves time.

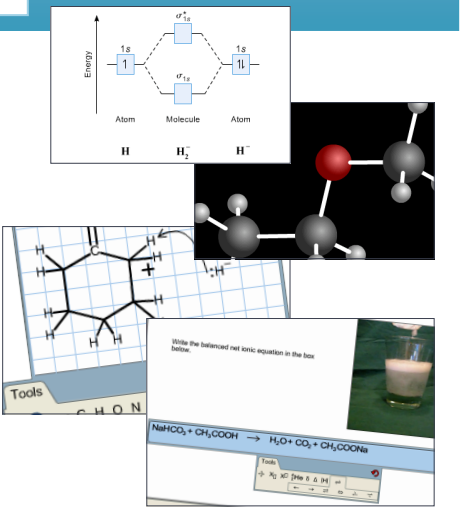
Proven. Software used by over 150,000 students.

Quality. Algorithmic content authored by Ph.D. educators who are experts at online instruction.

Relevant. Students draw Lewis structures, orbital diagrams, and graphs; select atoms in 3D structures; enter math and chemical equations; and complete virtual experiments.

Freedom. Create assignments from a large bank of quality content, and easily modify or create questions.

Support. Chemists support you and your curriculum.



"Sapling's homework system is the easiest and best that I have ever had students use… it adds a great deal to the students' understanding and conceptual development." – Instructor
